BACKPACKING

Back to nature

Good boots will take you wherever you want to go. They don't care about the weather, and they are not particular about the terrain, either. They just go. Your favourite new shoes combine high-tech solutions with natural materials. They are easy to handle. They alleviate pressure and offer important comfort over the long or short haul. They are there, for you, to serve, support and protect.

NEERING

Peaks are always challenging – that's why we like them. Harsh conditions and exposure to outdoor conditions with rapid weather changes can be everything but comfortable. And Alpina mountaineering boots prove the perfect companion, providing a well-insulated, protective and breathable shell for your demanding foot. They're with you every step of the perfect, challenging way.

TECHNICALS

Firm VIBRAM sole

The widely recognized and respected Vibram sole delivers unrivaled firmness, ensuring a steady hold on any and all surfaces, no matter how challenging – the best you can have between your foot and whatever stands below.

SYMPATEX waterproof membrane

Alpina boots are made with Sympatex, a recognized water-resistant membrane that protects the foot from any unwanted moisture. At the same time, it provides good ventilation, which means the boot is well suited to all kinds of weather and conditions.

ALPITEX membrane

Alpina engineers developed the Alpitex membrane based on years of experience, research and refinement. The membrane is water-resistant and allows for good boot ventilation and provides additional comfort.

Thinsulate insulation

Thinsulate insulation provides ideal conditions for the feet, keeping them twice as warm as in other linings. It allows the foot to breathe and provides extra warmth and comfort, even on unusually damp or cold days.

ALPITEX

Thinsulate[™]

INSULATION

The benefits of innovation

APPROACH

Exploring the future, today

Our fast-paced world demands fast thinking and acting. The right technology and innovation creates tomorrow's solutions today. Alpina Approach trekking shoes deliver speed and agility of movement, lightweight construction, comfortable fit and superior protection. Take the path less travelled and enjoy untouched nature in all its glory.

Adaptability

The volume control plate, positioned under the insole, allows for precise adjustment of boot volume, independently, for the left and right foot – because not all feet are created equal. Removing the plate provides greater shoe volume.

VOLUME CONTROL PLATE

4dry material

The very special 4dry material is highly water-resistant and breathable, making sure that any humidity is conveyed from the boot interior out, keeping the feet dry and comfortable.

Ventilation System

WINTER Icey voyager

Nature in the winter holds countless breathtaking moments to live and experience – and there's no reason why the elements should stop you. Alpina Winter Trekking shoes were developed to withstand wind, cold and snow, and in perfect comfort thanks to warm, waterproof and highly durable materials. Put them on and enjoy your winter like never before.
